Swapnil Baranwal

AI Engineer · Senior iOS Developer · Generative AI · IoT + ML

+91 8630011290 | swapnilbranwal21@gmail.com | github.com/Swapnilbaranwal | linkedin.com/in/swapnil-baranwal-0aa998196

PROFILE SUMMARY

Senior iOS Developer and AI Engineer with 4+ years of experience shipping production apps across fintech, IoT and e-commerce. Builds intelligent mobile experiences in Swift and SwiftUI, connects them to smart devices over BLE and MQTT, and adds AI where it solves real problems — chatbots, workflow automation, RAG and voice — using Claude and other AI tools to ship faster. Holds an Associate of Science in Artificial Intelligence, and has placed first or runner-up in three hackathons, including Zomato's national iOS hackathon.

CORE COMPETENCIES

iOS	Swift, SwiftUI, UIKit, Combine, CoreData	**Generative AI**	OpenAI, Gemini, Llama · Prompt Engineering
Architecture	MVVM, MVC · Reusable components	**Agentic AI**	Agents · RAG · Workflow Automation
IoT	BLE, CoreBluetooth, MQTT, Tuya IoT SDK	**AI-assisted Dev**	Claude, ChatGPT · Design-to-code
Cross-platform	React Native · REST APIs · Firebase	**Voice AI**	Voice Cloning, TTS · Vision / ML · Python

PROFESSIONAL EXPERIENCE

Sunday Labs — Client: Credgenics

Jan 2026 – Present

Senior iOS Developer (SDE 2) · **CG Collect · Case View · Fix My Score · AI Chatbot & Automation**

- Implemented real-time location tracking for field agents and screenshot-prevention security; shipped live on the App Store.
- Built the Case View module to surface case details, status and activity for collection agents; delivered Explore Loans and Rewards System features.
- Kept app flows in sync with the web platform and fixed React Native performance bottlenecks, improving stability.
- Building an in-house AI chatbot and LLM-driven automations that take repetitive work off the team's plate.
- Use Claude and other AI assistants day to day to turn Figma designs into SwiftUI/React Native screens and speed up coding, debugging and reviews.

Vestel International

Oct 2024 – Dec 2025

iOS Developer — IoT & Smart-Device Apps · **Moctor · AIDA · Akıllı Yaşam · Veezy — IoT + AI**

- Integrated Tuya IoT (MQTT) and BLE for real-time device control and reliable device data sync.
- Built Blood Pressure & Respiratory tracking for the Vestel Smart Watch with interactive health graphs and reusable SwiftUI components.
- Led the UIKit → SwiftUI migration and architecture refactor, improving stability, performance and synchronization.
- Implemented real-time smart-home appliance control and MQTT automation logic; built an LLM-based AI assistant for IoT troubleshooting.

Neuronimbus

Jul 2023 – Aug 2024

iOS Developer · **Nikon · TGWC · Neuro AI Chatbot**

- Shipped the Nikon production app with optimized product listing/search; integrated CoreLocation, Keychain, push notifications and analytics.
- Re-architected TGWC with MVVM, fixed JSON parsing/models and delivered booking, payments and new modules.
- Built the Neuro AI chat app from scratch with multilingual and voice support.

Interra Information Technologies

Jan 2022 – Jul 2023

iOS Intern → iOS Developer · **Keytalk (SwiftUI · UIKit · macOS)**

- Built the Keytalk app from scratch in SwiftUI with full UI and API integration, secure certificate installation and reusable components.
- Fixed UI/UX and storyboard issues across UIKit and macOS versions; managed compatibility and certificate setup.

AI / ML PROJECTS

- **Generative AI Chatbot** — Multimodal chat with image understanding, TTS replies and contextual memory.
- **AI Image Studio** — AI captions, natural-language image editing and embeddings-based semantic search.
- **Churn Prediction Model** — ML model predicting customer churn for single and bulk inputs.
- **Private Local LLM Chatbot** — Custom chatbot running fully offline on a local server; no external APIs.
- **Voice Cloning + TTS Engine** — Python pipeline that generates realistic cloned voice audio from text.
- **Real-Time Emergency System** — Location-based responder assignment with live status tracking.

ACHIEVEMENTS

- ★ **Winner — SwiftDidLoad, Zomato iOS Hackathon 2026.** First place at Zomato's national iOS hackathon, shipping a polished Swift/SwiftUI product under time pressure.
- ★ **Runner-up — Agora Conversational AI Hackathon.**
- ★ **Runner-up — Build with Swytchcode 2026.**
- ★ **Production apps live on the App Store** across fintech, IoT and e-commerce, including CG Collect (Credgenics) and Nikon.

EDUCATION

Associate of Science in Artificial Intelligence
Saras AI Institute · **2024 – 2026**

Master of Computer Applications
Galgotias University · **2020 – 2022** · **CGPA 8.65**

Bachelor of Computer Applications
Mahatma Jyotiba Phule University · **2016 – 2019** · **70%**
